

With his legendary debut album Harmonic Ascendant in 1979 **Robert Schroeder** started his 30 years long career as musician and sound creator of Electronic Music. Its useful to call this new and 19th solo work **30 Years After**. Music and cover artwork connects the past and present days.

It was the **Minimoog**, the **PPG**, the **ARP** or **KORG-synthesizer**, which once earned us a new kind of music, which enchanted us and gave us dreams and has to be level today. Electronic Music is a new term for a new type of music since the 70s. **Pink Floyd**, **Kraftwerk**, **Klaus Schulze** and **Tangerine Dream** were pioneers, paving the way for this new music. On his new CD "**30 Years After**" **Robert Schroeder** has crossed the sounds and atmospheres of once with the current opportunities.

A short cut from Harmonic Ascendant opens this varied CD. Track 2 – a total change of scenery, groovy rhythms and still exciting atmosphere. Deep sphere sounds leads **Hypnotics** over to the postmodern title **All You Can Dream**. A shared downbeat track with discreet voice samples and exciting arrangement and - how in films - it has a happy end. **Modifiers** is an upbeat-analogue-sequencer-power-track with flying elements, powerful, massive and spacey. **Let it flow...** the title is program. A relaxed and very characteristic downbeat track with great tunes, atmospheres and sounds - dream and fly away. **Destination Galactica** is Electronic Music a' la Berlin School by the finest, horny sequences, choirs and ARP melodies in the 70s / 80s years style, as we like it. The track glides in deep spheres over to **A New Message**, a piece of dreams, soul and sliding. Similar economy to the legendary **The Message**, the successful track from the 80's, are certainly felt. It's not wrong, just listen to the great track with a lovely downbeat atmosphere. The other tracks you should not miss.

All in all **30 Years After** is a well mixed concept album with a lot of variety, traditional and modern electronic sounds. You will experience this CD on good headphones as exciting and varied journey - your journey. **30 Years After**... thank you... have great fun.
