

LP & CD Music for the film "Glücksgedanken"

With the **Robert Schroeder's** seventh publication **BRAIN VOYAGER** eyes and ears opened in many places, because with **BRAIN VOYAGER** the music world got a **special sound** carrier. **BRAIN VOYAGER** is the **soundtrack** to the **1985** in the FRG in **3D** effect filmed **Ludwig TIECK** novella "**DES LEBENS ÜBERFLUSS**". Here by a new production technology **Schroeder** lent to his music "**SPACE**" in the most true sense of the word.

BRAIN VOYAGER is the worldwide first CD publication with music admissions in so-called **ART HEAD TECHNOLOGY**. **ART HEAD** (or often called dummyhead) and **DIGITALLY** was here the sound formula which allows to experience the work in the **crystal clear super sound**. The soft *Electronics Music* moved with classical elements and carries a character spatial really distinctively by the new production procedure, sounds are completely discernible.

The technology moreover, the so-called **AACHEN ART HEAD**, was developed by **Dr. GENUIT** in **RWTH Aachen**. The production of **Brain Voyager** was recorded in the studio and the mixdown was done in a church (picture left). There were installed eight loud-speaker points around the church and in the middle the **Aachen Art Head** for recording.

A prominent and noteworthy production was and is unconditional **BRAIN VOYAGER**.

And recognised one not only the nationwide media and hi-fi freaks (the CD received in the **German magazine Audio/1986** the evaluation **HiFi reference CD**).

Also the foreign countries became attentive by **BRAIN VOYAGER** massively on **Robert Schroeder**. Here on followed licence agreements with the **USA, Brazil, Canada, U.K. and Australia**.
