

ROBERT SCHROEDER COMPUTER VOICE

BELOVED AND NEW TRACKS ON LP & CD

1984 were released two more *Schroeder* productions. A publication of *PARADISE* as Compact Disc (LP release from 1983), which so was the first *Schroeder* CD, and on the other side his 6th solo production *COMPUTER VOICE*, as LP and CD.

Computer Voice (1984) is a fusion of *Robert's* best published titles to date (as new recordings) plus new compositions and a new sound. *COMPUTER VOICE* is also a balancing act between experimental, spherical electronics and rhythmic pop music. The tracks *Computer Voice* (from the LP "*MOSAIQUE*") and *Rotary Motion* (from the LP "*FLOATING MUSIC*") have been re-arranged and re-recorded. Also included are two tracks from the popular space project LP "*GALAXIE CYGNUS A*".

Guest's musicians were the guitarist **Charly Buechel** (guitar) and the bass player **Mickey Meuser** (*Ideal, Ina Deter*).

ROBERT SCHROEDER
COMPUTER VOICE

The 1979 for a few years signed contract with the IC label (founded in 1979 by Klaus Schulze) ran out after the publication of *PARADISE* in 1984 and was further extended by the artist. The LP/CD *COMPUTER VOICE* was the first *Schroeder* publication ""under the new flag", da-music GmbH.

COMPUTER VOICE offers both, rhythmical tracks as well as very spherical and experimental tracks. The German music magazine **SPOTLIGHT** (Issue 10/84) once aptly described *Schroeder* as "musical chameleon".

In **2009** *Robert* has done a **sound update** with **COMPUTER VOICE**. Not re-mixed but an all over sound correction with new computer technology. Today the CD *COMPUTER VOICE* is available in this high power sound update only.

(the track No.9 „Eclipse“ is a bonus track and available on the re-release since 2010 only.)

Best tracks: 1, 3, 4, 5, 7
