

## Authentically and beautiful - EM from the 80s

**D.MO Vol.3** is pure EM from the 80s and were also played with Original synthesizers of that time. Authentically and beautiful is this 26th solo CD of the German artist, who is active since 1978.

The tracks of these CD were composed and recorded between 1981 and 1991 in Robert's recording studio in Aachen. Over the years grow a lot of tracks, which are sometimes not the right to release, because they do not harmonise with other tracks of an album. So grows a big archive with unreleased tracks and often one can find some hidden treasures. Especially from today's view and listening with today ears Robert ask himself very often: Why such a good track was never released? Even more astonishing is the content and the sound quality of this CD D.MO in the third edition.

The Originals are kept most authentically. Here and there was just something filed, sanded, polished and one or the other effect or sound added.

The unique typical sound of a PPG Wave2, of a Moog-Synthesizer or of a Sequential drum computer awakes nostalgic memories.

**D.MO Vol.3** – charming sounds and atmospheres, which are heard very likely even today. Release in March 2012, of course on **Lambert Ringlage's** record label **Spheric Music**.

Have much fun.

**best tracks:** 1, 2, 3, 4, 5, 10 (10 Tracks / 64 Min)

Used Instrumente:

PPG Wave2, Minimoog, Multimoog, DX-7, D-110, Sequential Drumtraks, ATARI 1040ST
