

CLUB CHILL is a new studio project by German EM artist **Robert Schroeder**. Just in February 2010 the sound specialist has published his album *New Frequencies Vol. 1* on the EM label **Spheric Music** (SMCD-2022). With *New Frequencies* Schroeder has started a series with rhythmically dominated EM-music. For *Robert* surprisingly was particularly the success of *New Frequencies* in the club scene. The first edition of the CD was sold out already 4 weeks after publication.

And also **CLUB CHILL** is the first release of a new series inner half *Schroeder's* solo releases. The music on **CLUB CHILL** presents again an own style, which could neither seen as typical *Schroeder* release nor as *nEW fREQUENCIES* nor as typical *Food For Fantasy*. With his new album **CLUB CHILL** the high active artist delivers a very high chill out music with dominating relaxed downtempo tracks. „**Hang around and listen to ...**“ could one see as invitation and guidance, how could enjoy this experimental and also harmonic album at the best. But simply, listen to it.

The music prefers analogue synthesizer sounds and is sequencer stressed. Modern relaxed grooves, voice samples, interesting effect sounds, warm sound waves and nice melodies charms highly relaxed atmospheres.

Tracks like „**Love Is In The Air**“ (2) and „**Cold Desert**“ (10) will reach a lot of lovers because of its earworm character.

Chilling Me Softly (8) has nothing to do with the well known song **Killing Me Softly** from **Carly Simon**, except the small play on words.

CLUB CHILL Vol.1
Robert Schroeder
